

OfficeMaster Gate, the Unified Communications media gateway for Microsoft Office Communications Server 2007 R1/R2, and Microsoft Exchange Server 2007

The Microsoft certified media gateway *OfficeMaster Gate UC* interconnects the traditional telephony with Office Communications Server 2007 and Exchange Server 2007 – the new IP based platforms from Microsoft.

The high performance hardware from Ferrari electronic takes a key position in this new infrastructure as a reliable interface. It makes accessible the interesting Unified Messaging services of Exchange 2007 and allows worldwide telephony with Office Communications Server 2007 (OCS 2007 R1/R2).

The new Exchange features voice mail, fax reception and Outlook Voice Access are utilizable solely in connection with *OfficeMaster Gate UC* – in particular when the approved PBX (telephone system) still remains in use. This is what *OfficeMaster Gate UC* is made for: using this media gateway every enterprise can take advantage of the latest version of Exchange without need to modify the telephony infrastructure. *OfficeMaster Gate UC* supports every ISDN PBX available on the market. It is offered for 30 or 60 channels.

Teaming up with Microsoft Office Communications Server *OfficeMaster Gate UC* even replaces a fully functional telephone system and allows comfortable VoIP telephony directly from the PC – including call signaling at the workstation as well as audio conferences with several attendees but without expensive hardware. *OfficeMaster Gate UC* is „qualified Gateway for OCS 2007“.

OfficeMaster Gate UC can be extended step by step with Unified Messaging modules (fax dispatch, fax reception, SMS, voice mail) to a full Unified Communications controller. *OfficeMaster Gate UC* then also can be used for the best of class Unified Communications software *OfficeMaster*.

If classical services as fax and SMS are of great importance in addition to Exchange voice mail and/or OCS telephony, we recommend to choose *OfficeMaster Gate All in One*, the combination of UC media gateway and ISDN controller. This all-in-one solution is available for 2, 8, 30, and 60 channels.

If one starts with a 30 channel solution (1 x SS_{2M}/PRI as OfficeMaster Gate UC or OfficeMaster Gate All in One), one can upgrade to 60 channels (2 x SS_{2M}/PRI) without any need to change the hardware.

OfficeMaster Gate: Box version for connection with ISDN Basic Rate Interface (BRI)

- 20683 OfficeMaster Gate, unified messaging controller for fax, SMS and voicemail as well as ISDN/IP-Media Gateway connecting PBX with MS OCS 2007 R1/R2 and Exchange 2007 certified by Microsoft; 2 channels (1 x S₀/BRI), field extendable by up to 3 S₀/BRI interfaces, supports DSS1 und Q.SIG; box with power supply and power over ethernet
- 20693 OfficeMaster Gate, unified messaging controller for fax, SMS and voicemail as well as ISDN/IP-Media Gateway connecting PBX with MS OCS 2007 R1/R2 and Exchange 2007 certified by Microsoft; 8 channels (4 x S₀/BRI), supports DSS1 und Q.SIG; box with power supply and power over ethernet
- 2039 Installation Kit that integrates OfficeMaster Gate (art. no. 20633 and 20643) into 19“ rack extension for OfficeMaster Gate: box for connection with ISDN Basic Rate Interface (BRI)
- 20823 Extension of OfficeMaster Gate by one S₀/BRI-Interface (applicable in combination with Art.-No. 20683)

OfficeMaster Gate: 19“ version for connection with ISDN Primary Rate Interface (PRI)

- 20603 OfficeMaster Gate, unified messaging controller for fax, SMS and voicemail as well as ISDN/IP-Media Gateway connecting PABX with MS OCS 2007 R1/R2 and Exchange 2007 certified by Microsoft; 30 channels (1 x S_{2M}/E1), supports DSS1 and Q.SIG; 19“ box
- 20613 OfficeMaster Gate, unified messaging controller for fax, SMS and voicemail as well as ISDN/IP-Media Gateway connecting PBX with MS OCS 2007 R1/2 and Exchange 2007 certified by Microsoft; 60 channels (2 x S_{2M}/E1), supports DSS1 and Q.SIG; 19“ box
- 20653 OfficeMaster Gate UC, ISDN/IP-Media Gateway connecting PBX with MS OCS 2007 R1/R2 and Exchange 2007 certified by Microsoft; 30 channels (1 x S_{2M}/E1), supports DSS1 and Q.SIG; 19“ box
- 20663 OfficeMaster Gate UC, ISDN/IP-Media Gateway connecting PBX with MS OCS 2007 R1/R2 and Exchange 2007 certified by Microsoft; 60 channels (2 x S_{2M}/E1), supports DSS1 and Q.SIG; 19“ box extension for OfficeMaster Gate: 19“ Version for connection with ISDN Primary Rate Interface (PRI)
- 20803 Extension of OfficeMaster Gate and OfficeMaster Gate UC by one PRI-Interface (applicable in combination with Art.-Nor. 20603 und 20653)
- 20813 Extension of OfficeMaster Gate UC by Unified Messaging functionality for 15 B-channels for using OfficeMaster Software for (applicable in combination with Art.-No. 20653 und 20663)
